

Indoor Air Monitor

Now your customers can take steps to help improve their air quality and reduce health risks...

Introducing an air quality monitor for homes or commercial buildings – anywhere there's air!

Even low levels of Volatile Organic Compounds (VOCs) can cause serious health effects, especially for children, elderly people and those with asthma and allergies.

The **Indoor Air Monitor** detects even the smallest change in a room's air quality, enabling users to take control of the air they breathe for a healthier home, office or classroom!

For professionals and OEMs, the **Indoor Air Monitor** can be used as a selling tool for your own air quality equipment.

Simply...

- Plug the **Indoor Air Monitor** into a PC USB port in any indoor clean air environment
- Detects VOCs in seconds
 - **GREEN** light: **GOOD** air quality
 - **YELLOW** light: **FAIR** air quality
 - **RED** light: **POOR** air quality*Ventilate room to improve air quality*

The **Indoor Air Monitor** operates with AppliedSensor's state-of-the-art gas sensor presently used in automotive and building HVAC systems.

Now this technology is available for personal and professional use.

Private labeling available for quantity orders.
